8.0 EXEMPT/NON-EXEMPT PROJECT LIST

EXEMPT AND NON-EXEMPT PROJECTS

In evaluating the emissions impact of transportation activities in the conformity process, EPA regulations exempt from analysis certain projects included in a Transportation Improvement Program (TIP) or Transportation Plan (our MTP). This decision was due primarily to the assumption that these projects do not directly impact transportation related air emissions. The regulations identified two general categories of projects: 1) those exempt from regional emissions analysis and 2) other highway and transit projects. In the regional exemption category, the following projects are specifically named and are considered by this report to be classified as exempt:

- ✓ Intersection channelization projects;
- ✓ Intersection signalization projects at individual intersections;
- ✓ Interchange reconfiguration projects;
- ✓ Changes in vertical or horizontal alignments;
- ✓ Truck size and weight inspection stations; and
- ✓ Bus terminals and transfer points.

The "other highway and transit project" list is longer and includes four primary categories: 1) safety, 2) mass transit, 3) air quality, and 4) other. The West Memphis MPO has utilized the specific projects listed in each major category in conducting this conformity analysis. Please refer to the list of exempt projects that meet the exempt criteria.

Examples of exempt projects as it relates to the TIP include:

- Railroad/highway crossing projects
 - Planning and Technical Studies
 - Lighting Improvements (Enhancement Projects)
 - Several Bridge Projects-[Safety-Reconstruction of bridges (no additional travel lanes)]
-
